'Care and Feeding': The Asian ETS Consultants Program

Our research on tobacco industry documents is focused primarily on Asia. To facilitate systematic document analysis, initial searches focused on geographic terms representative of the Chinese, Malaysian and Hong Kong regions. This included country name, cities, regions and tobacco manufacturing sites truncated using the appropriate site syntax. Search words incorporated synonymous terms representative of the concept, acronyms, abbreviations, variations of spelling, etc. The results of these searches were then sorted by date and evaluated according to their degree of importance. During this process, the metadata for documents considered to be of high value were screened for further clues to conduct subsequent searches. Additional searches were conducted using names, events or publications concerned with the topic.

Geographical	Concepts	Individuals
malay*	ETS	rupp
kuala lumpur	passive smoking	leslie
